

# HESI Phosphorus Plus

**HESI Phosphorus Plus** is used in combination with Hesi Bloom Complex in the second half of the flowering phase.

During flowering, the plant develops an increased need for phosphorus and potassium. Using **Phosphorus Plus**, we give plants the right means at the right moment: phosphorus for extra formation of flowers and potassium for a fast transport to the flowers.

**Hesi Soil Nutrition** has been balanced to the ratios in the soil environment and ensures that the plants are taken care of in an optimal manner. Thanks to the use of high-quality ingredients, the plants absorb all substances offered to them, so that no residues are left behind.

With **Phosphorus Plus** the formation of the flowers is more powerful!

**HESI Phosphorus Plus** is also suitable for all forms of phosphorus or potassium deficiency.

**Use:** Add to feeding water in the second half of the flowering phase along with **HESI Bloom Complex**.

**Composition:** PK 7+5  
Phosphorus: 7,2% P<sub>2</sub>O<sub>5</sub>  
Potassium: 5,1 % K<sub>2</sub>O

**Dosage:** (additionally to **HESI Bloom Complex**)  
flowering plants: + 25ml Phosphorus Plus / 10 Liter

**Package sizes:** 0,5 L / 1 L / 5 L / 10 L / 20 L

**Note:**

The pH corrector of **HESI Bloom Complex** is also active together with **HESI Phosphorus Plus** and shifts the pH in a slightly acidic range, it is optimal for the plant area. .
