

HESI Bloom Complex

HESI Bloom Complex provides all the necessary substances to flowering plants for their extra needs during flowering. Apart from the nutrition (nitrogen, phosphorus, potassium, magnesium, calcium, trace elements etc.), **HESI Bloom Complex** has also been enriched with vital components (amino acids and vitamins) that stimulate the development of the plant in an optimal manner. The result of this is an exuberant bloom! In addition, **HESI Bloom Complex** contains a pH corrector.

The pH level of the feeding water is corrected to a slightly acidic value. The plant can absorb all the administered nutrients optimally around a slightly acidic value. **Bloom Complex** contains no unnecessary ballast and is therefore fully absorbed by the plant. The trace elements have been stabilized in organic complexes. That is why they remain available and stable at all pH levels, until they are absorbed by the roots.

Moreover, **Bloom Complex** contains two kinds of nitrogen: mineral and organic. All of this apparently keeps the EC content low with high effectiveness and activity of the nutrients. This is the reason why you should not base the dosage of the **HESI nutrition** on EC values, which you are used to doing with other supplement brands.

Therefore do not overdose!

Composition: NPK 3+3+4

Nitrogen 3,0% N, Phosphorus 2,6% P₂O₅, Potassium 3,6% K₂O

others: Magnesium, Calcium, Sulphate and

trace elements: Iron, Manganese, Zinc, Copper, Boron, Molybdenum plus vitamins B1, B2, B6, plant sugars and amino acids

Dosage - flowering plants:

50 ml / 10 Liter (+ up to 25ml **Phosphorus Plus** / 10 Liter)

Package sizes: 0,5 L / 1 L / 5 L / 10 L / 20 L
