

## *HESI - Phosphorus Plus*

HESI **Phosphorus Plus** gives extra phosphorus and potassium to flowering and blooming plants.

Flowering plants have a constantly growing need for phosphorus and potassium. With HESI **Phosphorus Plus**, the right amount of these is added at the right time.

The pH correction contained in HESI **Bloom Complex** is also active in combination with HESI **Phosphorus Plus**

HESI **Phosphorus Plus** is also suitable for all forms of phosphorus or potassium deficiency.

***HESI Bloom Complex and its pH correction works well together with HESI Phosphorus Plus.***

**Composition:** PK 7+5

Phosphorus: 7,2% P<sub>2</sub>O<sub>5</sub>

Potassium: 5,1% K<sub>2</sub>O

**Dosage:** (with additional **OrchiVit** or **Bloom Complex**)

flowering orchids: + 10ml **Phosphorus Plus** / 10 litre nutrient solution

paniculated orchids: + 10ml **Phosphorus Plus** / 10 litre nutrient solution

other flowering plants: + 25ml **Phosphorus Plus** / 10 litre nutrient solution

**Note:** HESI **Bloom Complex**'s **pH correction** is also active together with **Phosphorus Plus**. It changes the pH value to slightly acidic, optimal for the plants.
